Why an eye exam?

Taking care of your eyes doesn't just mean having clear vision. Your eye care provider identifies both vision correction needs and emerging health issues during your annual eye exam.

Eye exams can detect conditions like diabetes early, thus preventing future unnecessary medical costs.

An eye exam takes less than an hour and consists of quick and simple visual acuity tests.

Unidentified vision problems can cause headaches and dizziness and can hinder learning.

Did you know?

All of your body's veins and arteries end in your eye. That's why your eye exam is key in detecting early chronic and systemic diseases like diabetes and hypertension.
